

Onda is not just a shipyard

Onda is a

Philosophy

It's a philosophy that encompasses our most deeply rooted principles on design harmony and yachtmanship.

When the first Onda was built in 1962, it set new levels of excellence in seakeeping and style. The Onda, Superonda and Magna marked their era with significant presence in both the pleasure and international military markets.

We represent the citizen of the world; the refined yachtsman that values our principles and identifies the design qualities embodied in our boats.

As we introduce Onda to the world, we feel confident that together we have a great chance of building products that will become part of your heritage. And ours.

George Riginos
President

Heritage

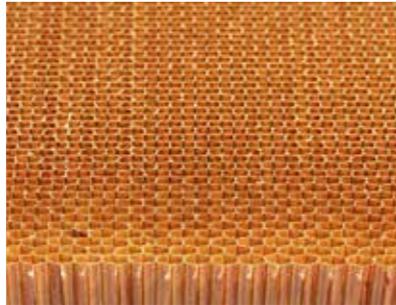

Our history. Our future.

History

Established in 1962, the Onda shipyard had significant presence in both the pleasure and the international military markets with the Superonda and Magna models, which were characterized by their exceptional sea keeping and reliability.

The heritage of the Onda brand, which served the Greek Army and other governmental bodies for more than four decades, our top quality building standards and practices, as well as our close collaboration with the aerospace industry ensure innovative and reliable solutions with limited lifetime warranty.

Who we are

Onda Tenders comprises of a group of passionate and highly skilled professionals with over 40 years of experience in the yachting sector.

The acquisition and relaunching of the Onda brand as a luxury tender builder was the team's strategic objective taking into consideration its vast experience as one of the most successful tender dealers in the East Mediterranean.

Onda Tenders is dedicated to offering tenders that excel in meeting any superyacht's needs. Its bespoke limousine tenders and custom chase boats are engineered to offer a smooth, quiet and comfortable ride as well as ease of service and high reliability.

Their hulls offer state of the art design, exceptional sea keeping virtues and a great ease of handling. With top quality standards and building practices Onda tenders offers innovative and reliable solutions with a limited lifetime warranty.

Onda Tenders is uniquely positioned to serve the superyacht tender market with fully customized and carefully engineered solutions that ensure that both the owner's and the crew's specific requirements and high expectations are met.

Designed in Scandinavia by the Mannerfelt Design Team and engineered by a group of passionate and highly skilled professionals.

Our bespoke limousine tenders and custom chase boats are engineered to offer a smooth, quiet and comfortable ride as well as ease of service and high reliability.

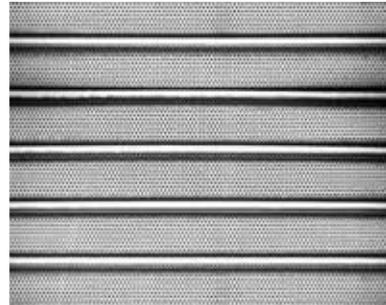

Our hulls offer state of the art design, exceptional sea keeping virtues and a great ease of handling. With the ability to come in plane at as low as 11 knots and

Our tenders are built using exclusively EU supplied material and are constructed in a controlled temperature and humidity environment ensuring an exceptional composite construction quality.

321L
LIMO TENDER

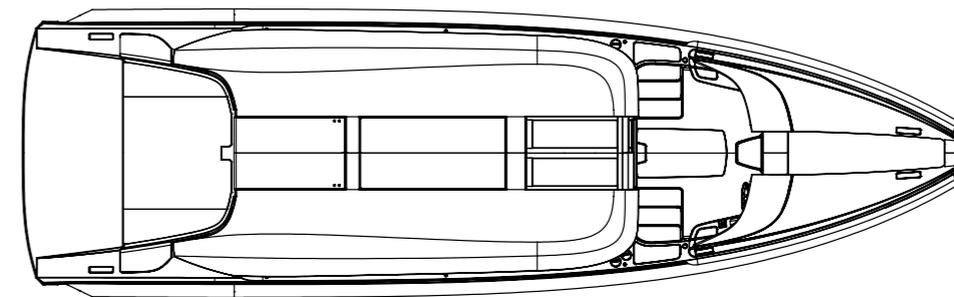

In collaboration with the Mannerfelt Design Team, Onda Tenders designed a very innovative and unique hull offering smooth and fast cruising, with a top speed of 42 knots powered by two 220 HP Volvo Penta D3 engines.

The owner's specification was a fast cruising tender that could comfortably carry 10 passengers and 2 crew members.

This limousine was customized to match its mothership's exterior styling and the color tones and minimal aesthetics of its interior.

Specifications

Length overall	9,90m
Beam	3,28m
Hull	Deep-V
Displacement	Two ventilated steps
Fuel capacity	3,200kg(approx.) 600l
Water capacity	120l
Max Horsepower	2 x 370 HP
Engine options	Inboard or outboard

331GT

GRAN TURISMO

The 331GT has been designed by the Mannerfelt Design Team and uses a revolutionary new hull technology which offers a very smooth ride, high fuel efficiency and very high speeds.

The 331 Grand Tourism is a tender which offers ample deck space, fully customizable due to its modular design approach.

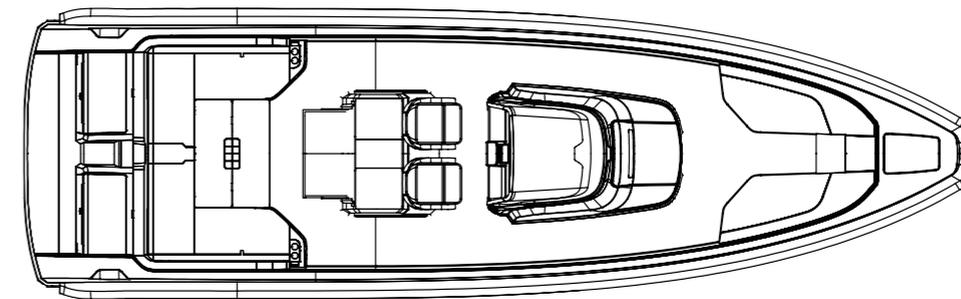

The model is based on a state of the art hull design and deck design by MD team. The 331 GT is capable of achieving high speeds without compromises

in comfort and safety. Weather designed to offer spacious sundeck options or to maximize seating capacity, its 3,05 internal width, sets new standards in the category.

The ease of walking around, as well as tender's high gunwales makes it very friendly in use to both crew and guests.

The 331 GT is a fast and comfortable chase tender, giving true meaning to its acronym.

341P
PATROL

The Patrol tender was based on the legendary Magna hull, a 10-meter boat with a 66-degree bow deadrise that was used extensively for military operations, originally designed to carry 12 navy SEALs with their armory and capable of reaching speeds of over 55 knots at very heavy seas.

The Onda team designed the Patrol specifically as a multi-use chase tender with a specification of being able to cruise safely in adverse weather conditions as well as to smoothly transport the mothership's guests.
